¹ APY (Annual Percentage Yield) reflects the total amount of dividends paid on this account based on the dividend rate and frequency of compounding in a 365-day period. The dividend rate on certificate accounts is fixed for a specific period of time, called a term. The dividend rate is based on the dividend rate in effect at the time you make the deposit. We compound dividends daily and will pay dividends quarterly on the last day of each quarter unless otherwise stated, and at maturity. The dividend period is also quarterly, for example, the beginning date of the first dividend period of the calendar year is January 1 and the ending date of such dividend period is March 31. All other dividend periods follow this same pattern of dates. The dividend declaration date is the ending date of a dividend period, and for the example is March 31. Upon your request, you may have your dividends paid monthly, annually, or at maturity. Withdrawal of dividends and fees may reduce earnings on this account.
